Internet Connection   Download   385 kbit/s

Machines   tapio connected machines[1,2]

DataSave | Function

The machine[1,2] automatically creates backups of the production and configuration files (individually depending on the machine manufacturer) in tapio for all supported machines[1,2]. Thus, you are protect against loss of data and enable faster service recovery in case of machine[1,2] failures. The backup time can be defined individually on each machine[1,2] with a DataSave license.

[1] tapio partners with integrated their machines.
[2] availability varies by machine type and manufacturer and needs to be check individually.

1   Register your company at www.tapio.one

www.tapio.one

2   Register your machines[1,2] in your company account. The connection of tapio
       ready machines[1,2] with tapio is automated (free of charge).
       "tapio readiness" and possible updates can be checked with the machine
       manufacturer.

3   Go to the tapio shop and buy DataSave licenses per machine[1,2]

4   Assign purchased DataSave licenses to your active machines[1,2]

5   On the machine[1,2], open the corresponding manufacturer's application and
       define the backup time per machine[1,2]

       Done.
